

# Brain MRI — Alzheimer Detection (2D image)

Generated 2026-04-19 09:07 UTC · Report ID 10

## Patient information

|              |                     |
|--------------|---------------------|
| Name         | patient1            |
| Patient ID   | 2                   |
| Age          | 22                  |
| Sex / gender | Not provided        |
| Upload date  | 2026-04-19T09:05:42 |

## Model results

|                        |                                         |
|------------------------|-----------------------------------------|
| AI model               | PyTorch ResNet (alz_model_accurate.pth) |
| Prediction             | <b>Class 3</b>                          |
| Confidence (top class) | 88.53%                                  |
| Classes                | 4                                       |

## Class probabilities

|                                                                 |
|-----------------------------------------------------------------|
| Class 0: 11.45%; Class 1: 0.01%; Class 2: 0.0%; Class 3: 88.53% |
|-----------------------------------------------------------------|

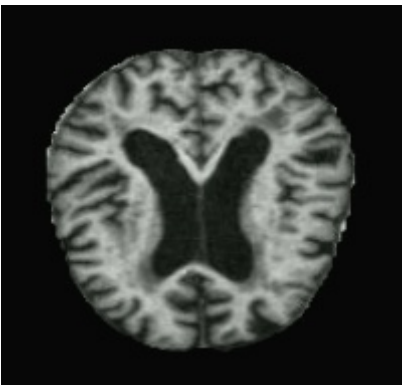

Image submitted for this analysis (patient upload).

## Clinical note

---

The classifier's top prediction is Class 3 with estimated confidence 88.53% across 4 output classes. This is an AI screening aid only.
